Description

Fundamentals of Database Systems 6th Edition by Ramez Elmasri
Fundamentals of Database Systems 6th Edition by Ramez Elmasri
Clear explanations of theory and design, broad coverage of models and real systems, and an up-to-date introduction to modern database technologies result in a leading introduction to database systems. Intended for computer science majors, Fundamentals of Database Systems, 6/e emphasizes math models, design issues, relational algebra, and relational calculus.
A lab manual and problems give students opportunities to practice the fundamentals of design and implementation. Real-world examples serve as engaging, practical illustrations of database concepts. The Sixth Edition maintains its coverage of the most popular database topics, including SQL, security, and data mining, and features increased emphasis on XML and semi-structured data.
Part 1: Introduction to Databases
Chapter 1 Databases and Database Users 3
1.1 Introduction 4
1.2 An Example 6
1.3 Characteristics of the Database Approach 9
1.4 Actors on the Scene 14
1.5 Workers behind the Scene 16
1.6 Advantages of Using the DBMS Approach 17
1.7 A Brief History of Database Applications 23
1.8 When Not to Use a DBMS 26
1.9 Summary 27
Review Questions 27
Exercises 28
Selected Bibliography 28
Chapter 2 Database System Concepts and Architecture 29
2.1 Data Models, Schemas, and Instances 30
2.2 Three-Schema Architecture and Data Independence 33
2.3 Database Languages and Interfaces 36
2.4 The Database System Environment 40
2.5 Centralized and Client/Server Architectures for DBMSs 44
2.6 Classification of Database Management Systems 49
2.7 Summary 52
Review Questions 53
Exercises 54
Selected Bibliography 55
Part 2: Relational Data Model and SQL
Chapter 3 The Relational Data Model and Relational Database Constraints 59
3.1 Relational Model Concepts 60
3.2 Relational Model Constraints and Relational Database Schemas 67
3.3 Update Operations, Transactions, and Dealing with Constraint Violations 75
3.4 Summary 79
Review Questions 80
Exercises 80
Selected Bibliography 85
Chapter 4 Basic SQL 87
4.1 SQL Data Definition and Data Types 89
4.2 Specifying Constraints in SQL 94
4.3 Basic Retrieval Queries in SQL 97
4.4 INSERT, DELETE, and UPDATE Statements in SQL 107
4.5 Additional Features of SQL 110
4.6 Summary 111
Review

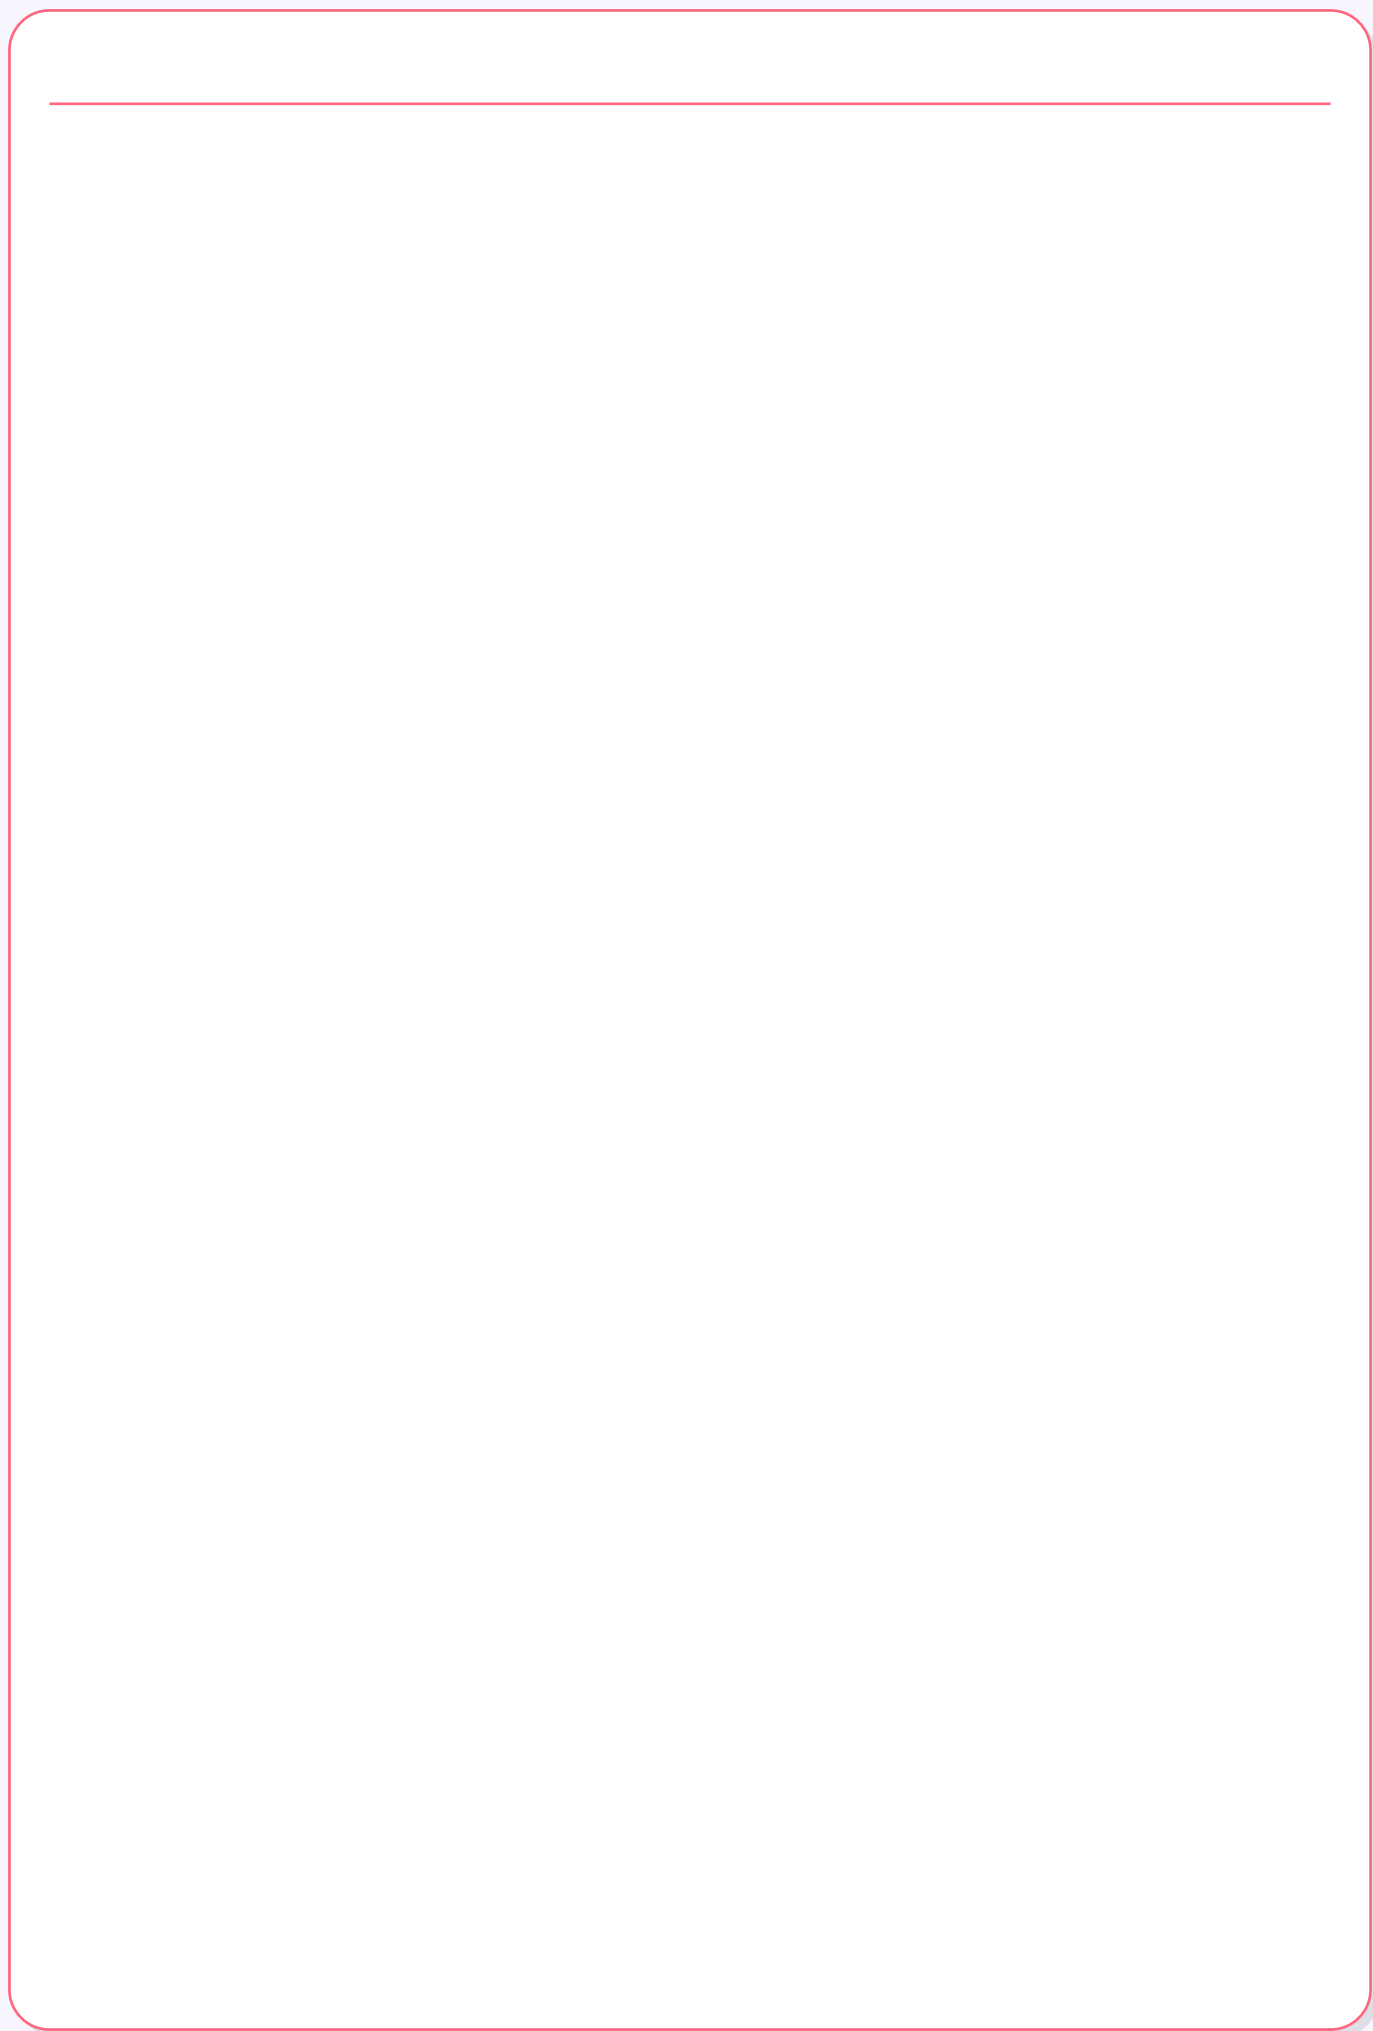

Questions 112\nExercises 112\nSelected Bibliography 114\nChapter 5 More SQL: Complex Queries, Triggers, Views, and Schema Modification 115\n5.1 More Complex SQL Retrieval Queries 115\n5.2 Specifying Constraints as Assertions and Actions as Triggers 131\n5.3 Views (Virtual Tables) in SQL 133\n5.4 Schema Change Statements in SQL 137\n5.5 Summary 139\nReview Questions 141\nExercises 141\nSelected Bibliography 143\nChapter 6 The Relational Algebra and Relational Calculus 145\n6.1 Unary Relational Operations: SELECT and PROJECT 147\n6.2 Relational Algebra Operations from Set Theory 152\n6.3 Binary Relational Operations: JOIN and DIVISION 157\n6.4 Additional Relational Operations 165\n6.5 Examples of Queries in Relational Algebra 171\n6.6 The Tuple Relational Calculus 174\n6.7 The Domain Relational Calculus 183\n6.8 Summary 185\nReview Questions 186\nExercises 187\nLaboratory Exercises 192\nSelected Bibliography 194\nPart 3: Conceptual Modeling and Database Design\nChapter 7 Data Modeling Using the Entity-Relationship (ER) Model 199\n7.1 Using High-Level Conceptual Data Models for Database Design 200\n7.2 A Sample Database Application 202\n7.3 Entity Types, Entity Sets, Attributes, and Keys 203\n7.4 Relationship Types, Relationship Sets, Roles, and Structural Constraints 212\n7.5 Weak Entity Types 219\n7.6 Refining the ER Design for the COMPANY Database 220\n7.7 ER Diagrams, Naming Conventions, and Design Issues 221\n7.8 Example of Other Notation: UML Class Diagrams 226\n7.9 Relationship Types of Degree Higher than Two 228\n7.10 Summary 232\nReview Questions 234\nExercises 234\nLaboratory Exercises 241\nSelected Bibliography 243\nChapter 8 The Enhanced Entity-Relationship (EER) Model 245\n8.1 Subclasses, Superclasses, and Inheritance 246\n8.2 Specialization and Generalization 248\n8.3 Constraints and Characteristics of Specialization and Generalization Hierarchies 251\n8.4 Modeling of UNION Types Using Categories 258\n8.5 A Sample UNIVERSITY EER Schema, Design Choices, and Formal Definitions 260\n8.6 Example of Other Notation: Representing Specialization and Generalization in UML Class Diagrams 265\n8.7 Data Abstraction, Knowledge Representation, and Ontology Concepts 267\n8.8 Summary 273\nReview Questions 273\nExercises 274\nLaboratory Exercises 281\nSelected Bibliography 284\nChapter 9 Relational Database Design by ER and EER-to-Relational Mapping 285\n9.1 Relational Database Design Using ER-to-Relational Mapping 286\n9.2 Mapping EER Model Constructs to Relations 294\n9.3 Summary 299\nReview Questions 299\nExercises 299\nLaboratory Exercises 301\nSelected Bibliography 302\nChapter 10 Practical Database Design Methodology and Use of UML Diagrams 303\n10.1 The Role of Information Systems in Organizations 304\n10.2 The Database Design and Implementation Process 309\n10.3 Use of UML Diagrams as an Aid to Database Design Specification 328\n10.4 Rational Rose: A UML-Based Design Tool 337\n10.5 Automated Database Design Tools 342\n10.6 Summary 345\nReview Questions 347\nSelected Bibliography 348\nPart 4: Object, Object-Relational, and XML

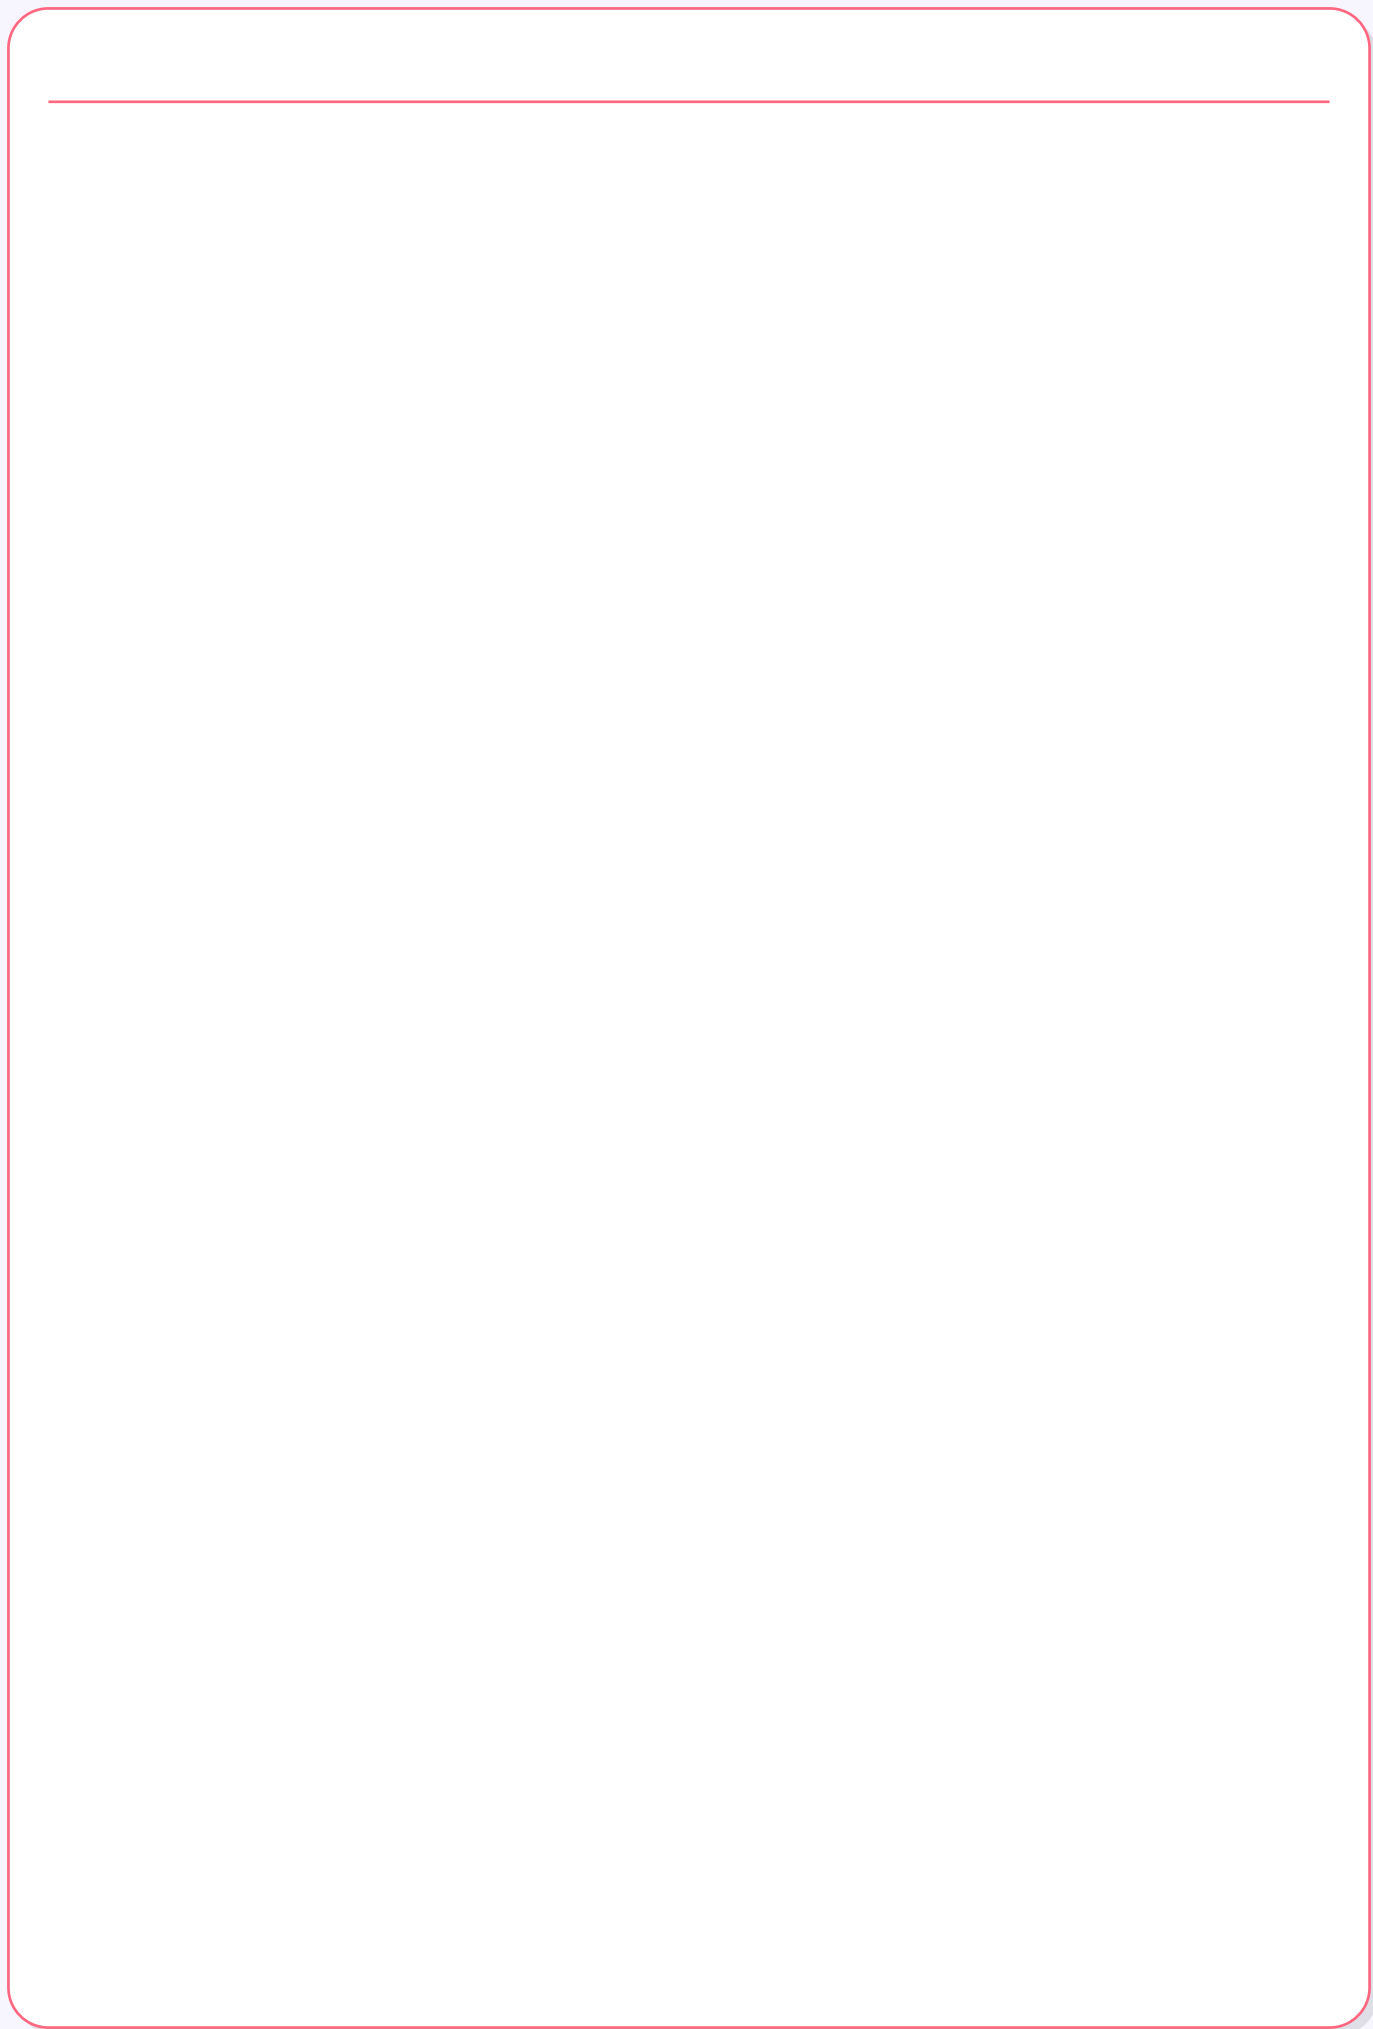

Models\nChapter 11 Object and Object-Relational Databases 353\n11.1 Overview of Object Database Concepts 355\n11.2 Object-Relational Features: Object Database Extensions to SQL 369\n11.3 The ODMG Object Model and the Object Definition Language ODL 376\n11.4 Object Database Conceptual Design 395\n11.5 The Object Query Language OQL 398\n11.6 Overview of the C++ Language Binding in the ODMG Standard 407\n11.7 Summary 408\nReview Questions 409\nExercises 411\nSelected Bibliography 412\nChapter 12 XML: Extensible Markup Language 415\n12.1 Structured, Semistructured, and Unstructured Data 416\n12.2 XML Hierarchical (Tree) Data Model 420\n12.3 XML Documents, DTD, and XML Schema 423\n12.4 Storing and Extracting XML Documents from Databases 431\n12.5 XML Languages 432\n12.6 Extracting XML Documents from Relational Databases 436\n12.7 Summary 442\nReview Questions 442\nExercises 443\nSelected Bibliography 443\nPart 5: Database Programming Techniques\nChapter 13 Introduction to SQL Programming Techniques 447\n13.1 Database Programming: Techniques and Issues 448\n13.2 Embedded SQL, Dynamic SQL, and SQLJ 451\n13.3 Database Programming with Function Calls: SQL/CLI and JDBC 464\n13.4 Database Stored Procedures and SQL/PSM 473\n13.5 Comparing the Three Approaches 476\n13.6 Summary 477\nReview Questions 478\nExercises 478\nSelected Bibliography 479\nChapter 14 Web Database Programming Using PHP 481\n14.1 A Simple PHP Example 482\n14.2 Overview of Basic Features of PHP 484\n14.3 Overview of PHP Database Programming 491\n14.4 Summary 496\nReview Questions 496\nExercises 497\nSelected Bibliography 497\nPart 6: Database Normalization Theory\nChapter 15 Basics of Functional Dependencies and Normalization for Relational Databases 501\n15.1 Informal Design Guidelines for Relation Schemas 503\n15.2 Functional Dependencies 513\n15.3 Normal Forms Based on Primary Keys 516\n15.4 General Definitions of Second and Third Normal Forms 525\n15.5 Boyce-Codd Normal Form 529\n15.6 Multivalued Dependency and Fourth Normal Form 531\n15.7 Join Dependencies and Fifth Normal Form 534\n15.8 Summary 535\nReview Questions 536\nExercises 537\nLaboratory Exercises 542\nSelected Bibliography 542\nChapter 16 Relational Database Design Algorithms and Further Dependencies 543\n16.1 Further Topics in Functional Dependencies: Inference Rules, Equivalence, and Minimal Cover 545\n16.2 Properties of Relational Decompositions 551\n16.3 Algorithms for Relational Database Schema Design 557\n16.4 About Nulls, Dangling Tuples, and Alternative Relational Designs 563\n16.5 Further Discussion of Multivalued Dependencies and 4NF 567\n16.6 Other Dependencies and Normal Forms 571\n16.7 Summary 575\nReview Questions 576\nExercises 576\nLaboratory Exercises 578\nSelected Bibliography 579\nPart 7: File Structures, Indexing, and Hashing\nChapter 17 Disk Storage, Basic File Structures, and Hashing 583\n17.1 Introduction 584\n17.2 Secondary Storage Devices 587\n17.3 Buffering of Blocks 593\n17.4 Placing File Records on Disk 594\n17.5 Operations on Files 599\n17.6 Files of Unordered Records (Heap Files) 601\n17.7 Files

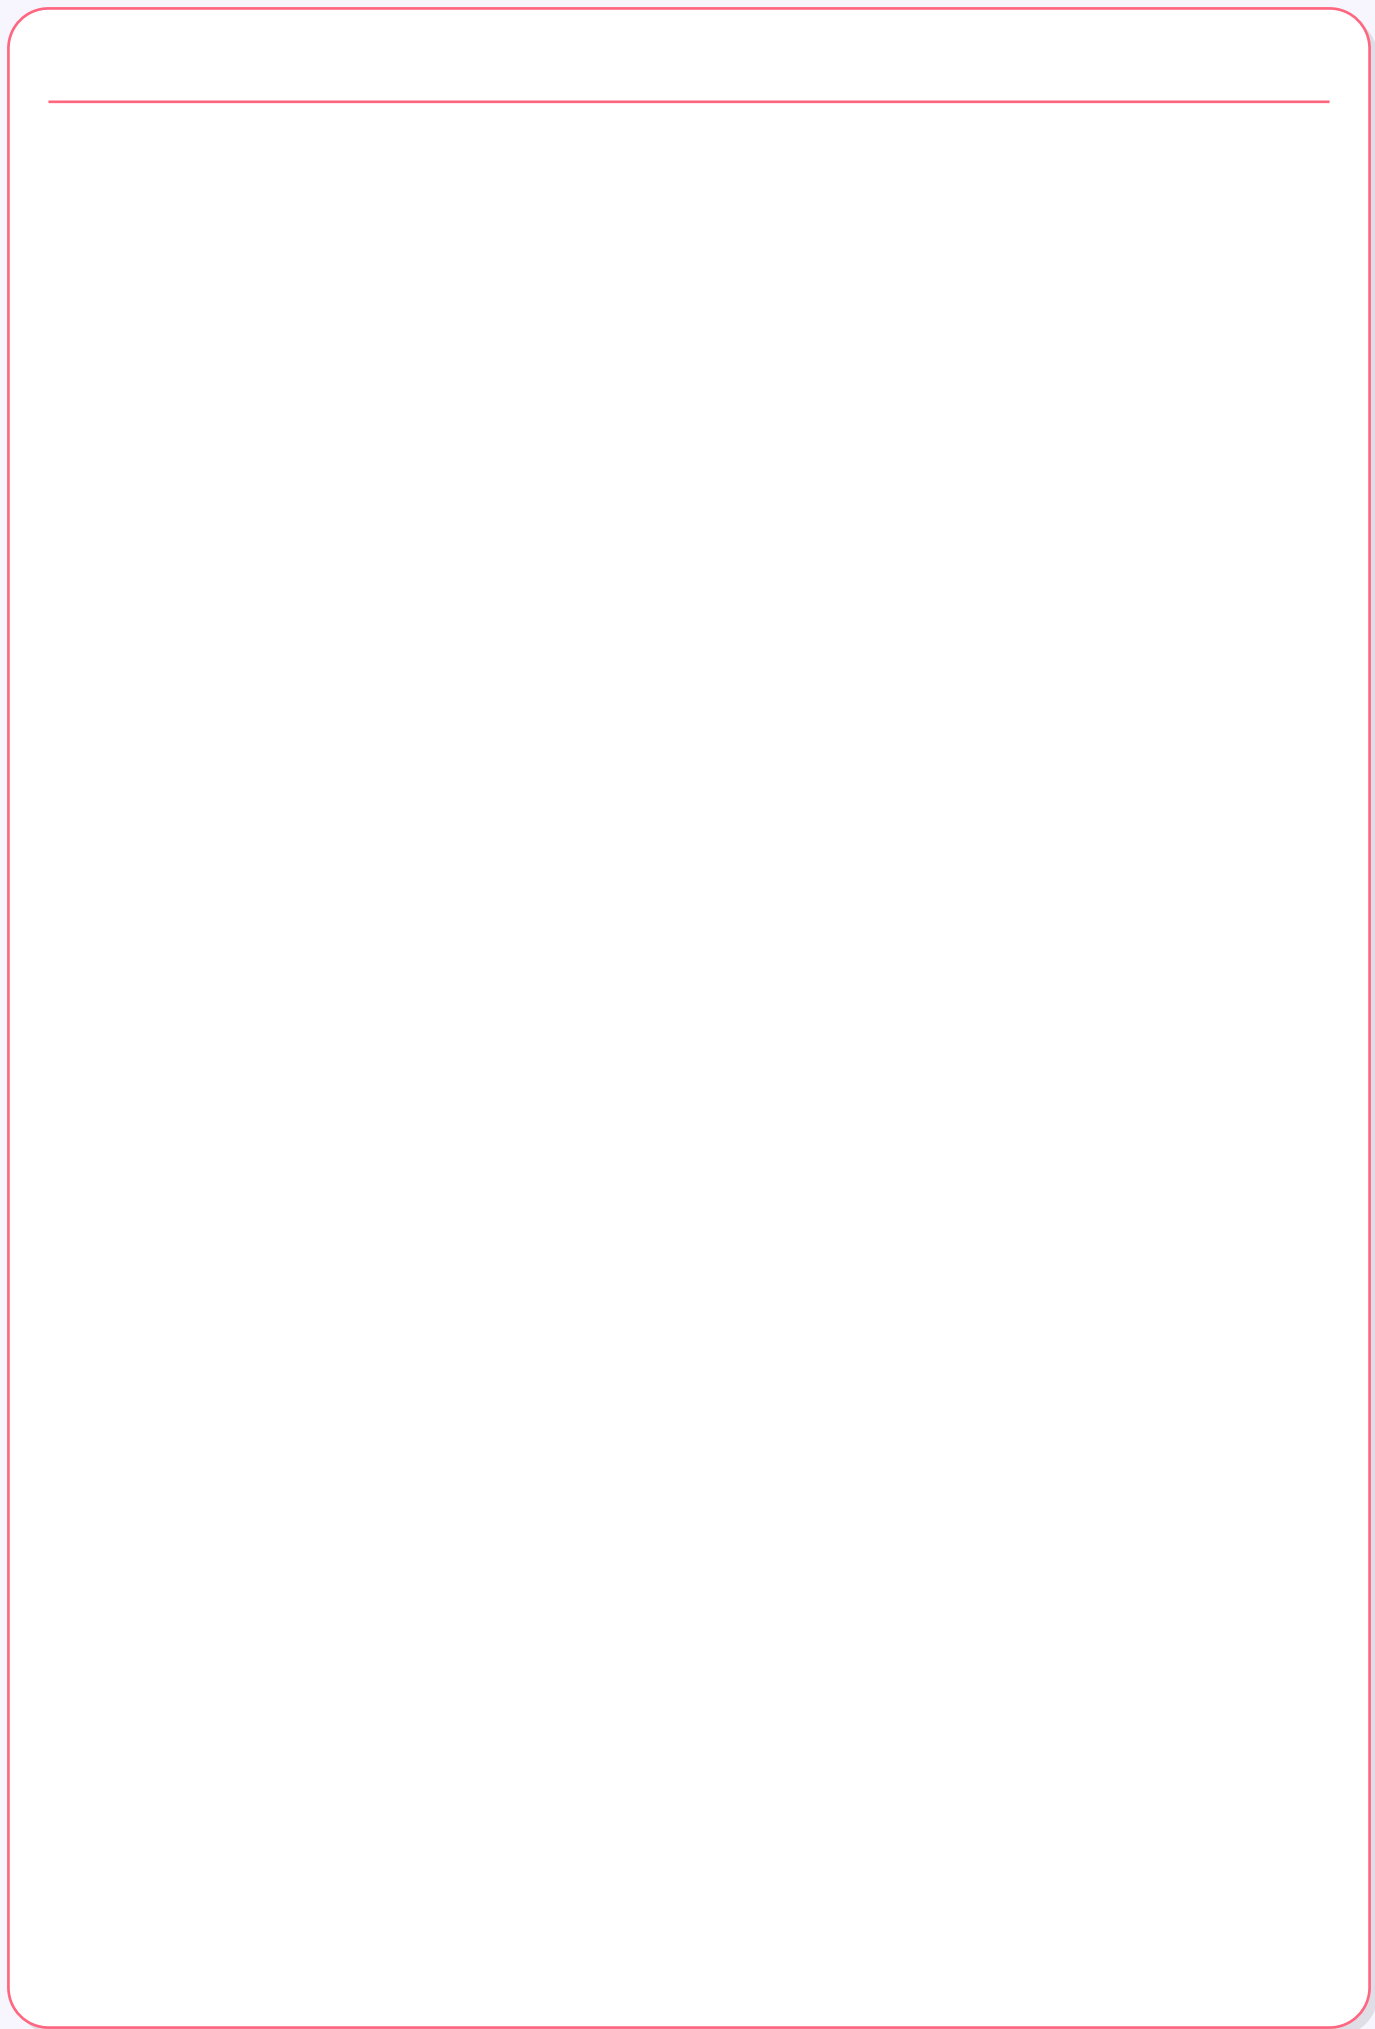

of Ordered Records (Sorted Files) 603\n17.8 Hashing Techniques 606\n17.9 Other Primary File Organizations 616\n17.10 Parallelizing Disk Access Using RAID Technology 617\n17.11 New Storage Systems 621\n17.12 Summary 624\nReview Questions 625\nExercises 626\nSelected Bibliography 630\nChapter 18 Indexing Structures for Files 631\n18.1 Types of Single-Level Ordered Indexes 632\n18.2 Multilevel Indexes 643\n18.3 Dynamic Multilevel Indexes Using B-Trees and B+-Trees 646\n18.4 Indexes on Multiple Keys 660\n18.5 Other Types of Indexes 663\n18.6 Some General Issues Concerning Indexing 668\n18.7 Summary 670\nReview Questions 671\nExercises 672\nSelected Bibliography 674\nPart 8: Query Processing, Optimization, and Database Tuning\nChapter 19 Algorithms for Query Processing and Optimization 679\n19.1 Translating SQL Queries into Relational Algebra 681\n19.2 Algorithms for External Sorting 682\n19.3 Algorithms for SELECT and JOIN Operations 685\n19.4 Algorithms for PROJECT and Set Operations 696\n19.5 Implementing Aggregate Operations and OUTER JOINS 698\n19.6 Combining Operations Using Pipelining 700\n19.7 Using Heuristics in Query Optimization 700\n19.8 Using Selectivity and Cost Estimates in Query Optimization 710\n19.9 Overview of Query Optimization in Oracle 721\n19.10 Semantic Query Optimization 722\n19.11 Summary 723\nReview Questions 723\nExercises 724\nSelected Bibliography 725\nChapter 20 Physical Database Design and Tuning 727\n20.1 Physical Database Design in Relational Databases 727\n20.2 An Overview of Database Tuning in Relational Systems 733\n20.3 Summary 739\nReview Questions 739\nSelected Bibliography 740\nPart 9: Transaction Processing, Concurrency Control, and Recovery\nChapter 21 Introduction to Transaction Processing Concepts and Theory 743\n21.1 Introduction to Transaction Processing 744\n21.2 Transaction and System Concepts 751\n21.3 Desirable Properties of Transactions 754\n21.4 Characterizing Schedules Based on Recoverability 755\n21.5 Characterizing Schedules Based on Serializability 759\n21.6 Transaction Support in SQL 770\n21.7 Summary 772\nReview Questions 772\nExercises 773\nSelected Bibliography 775\nChapter 22 Concurrency Control Techniques 777\n22.1 Two-Phase Locking Techniques for Concurrency Control 778\n22.2 Concurrency Control Based on Timestamp Ordering 788\n22.3 Multiversion Concurrency Control Techniques 791\n22.4 Validation (Optimistic) Concurrency Control Techniques 794\n22.5 Granularity of Data Items and Multiple Granularity Locking 795\n22.6 Using Locks for Concurrency Control in Indexes 798\n22.7 Other Concurrency Control Issues 800\n22.8 Summary 802\nReview Questions 803\nExercises 804\nSelected Bibliography 804\nChapter 23 Database Recovery Techniques 807\n23.1 Recovery Concepts 808\n23.2 NO-UNDO/REDO Recovery Based on Deferred Update 815\n23.3 Recovery Techniques Based on Immediate Update 817\n23.4 Shadow Paging 820\n23.5 The ARIES Recovery Algorithm 821\n23.6 Recovery in Multidatabase Systems 825\n23.7 Database Backup and Recovery from Catastrophic Failures 826\n23.8 Summary 827\nReview

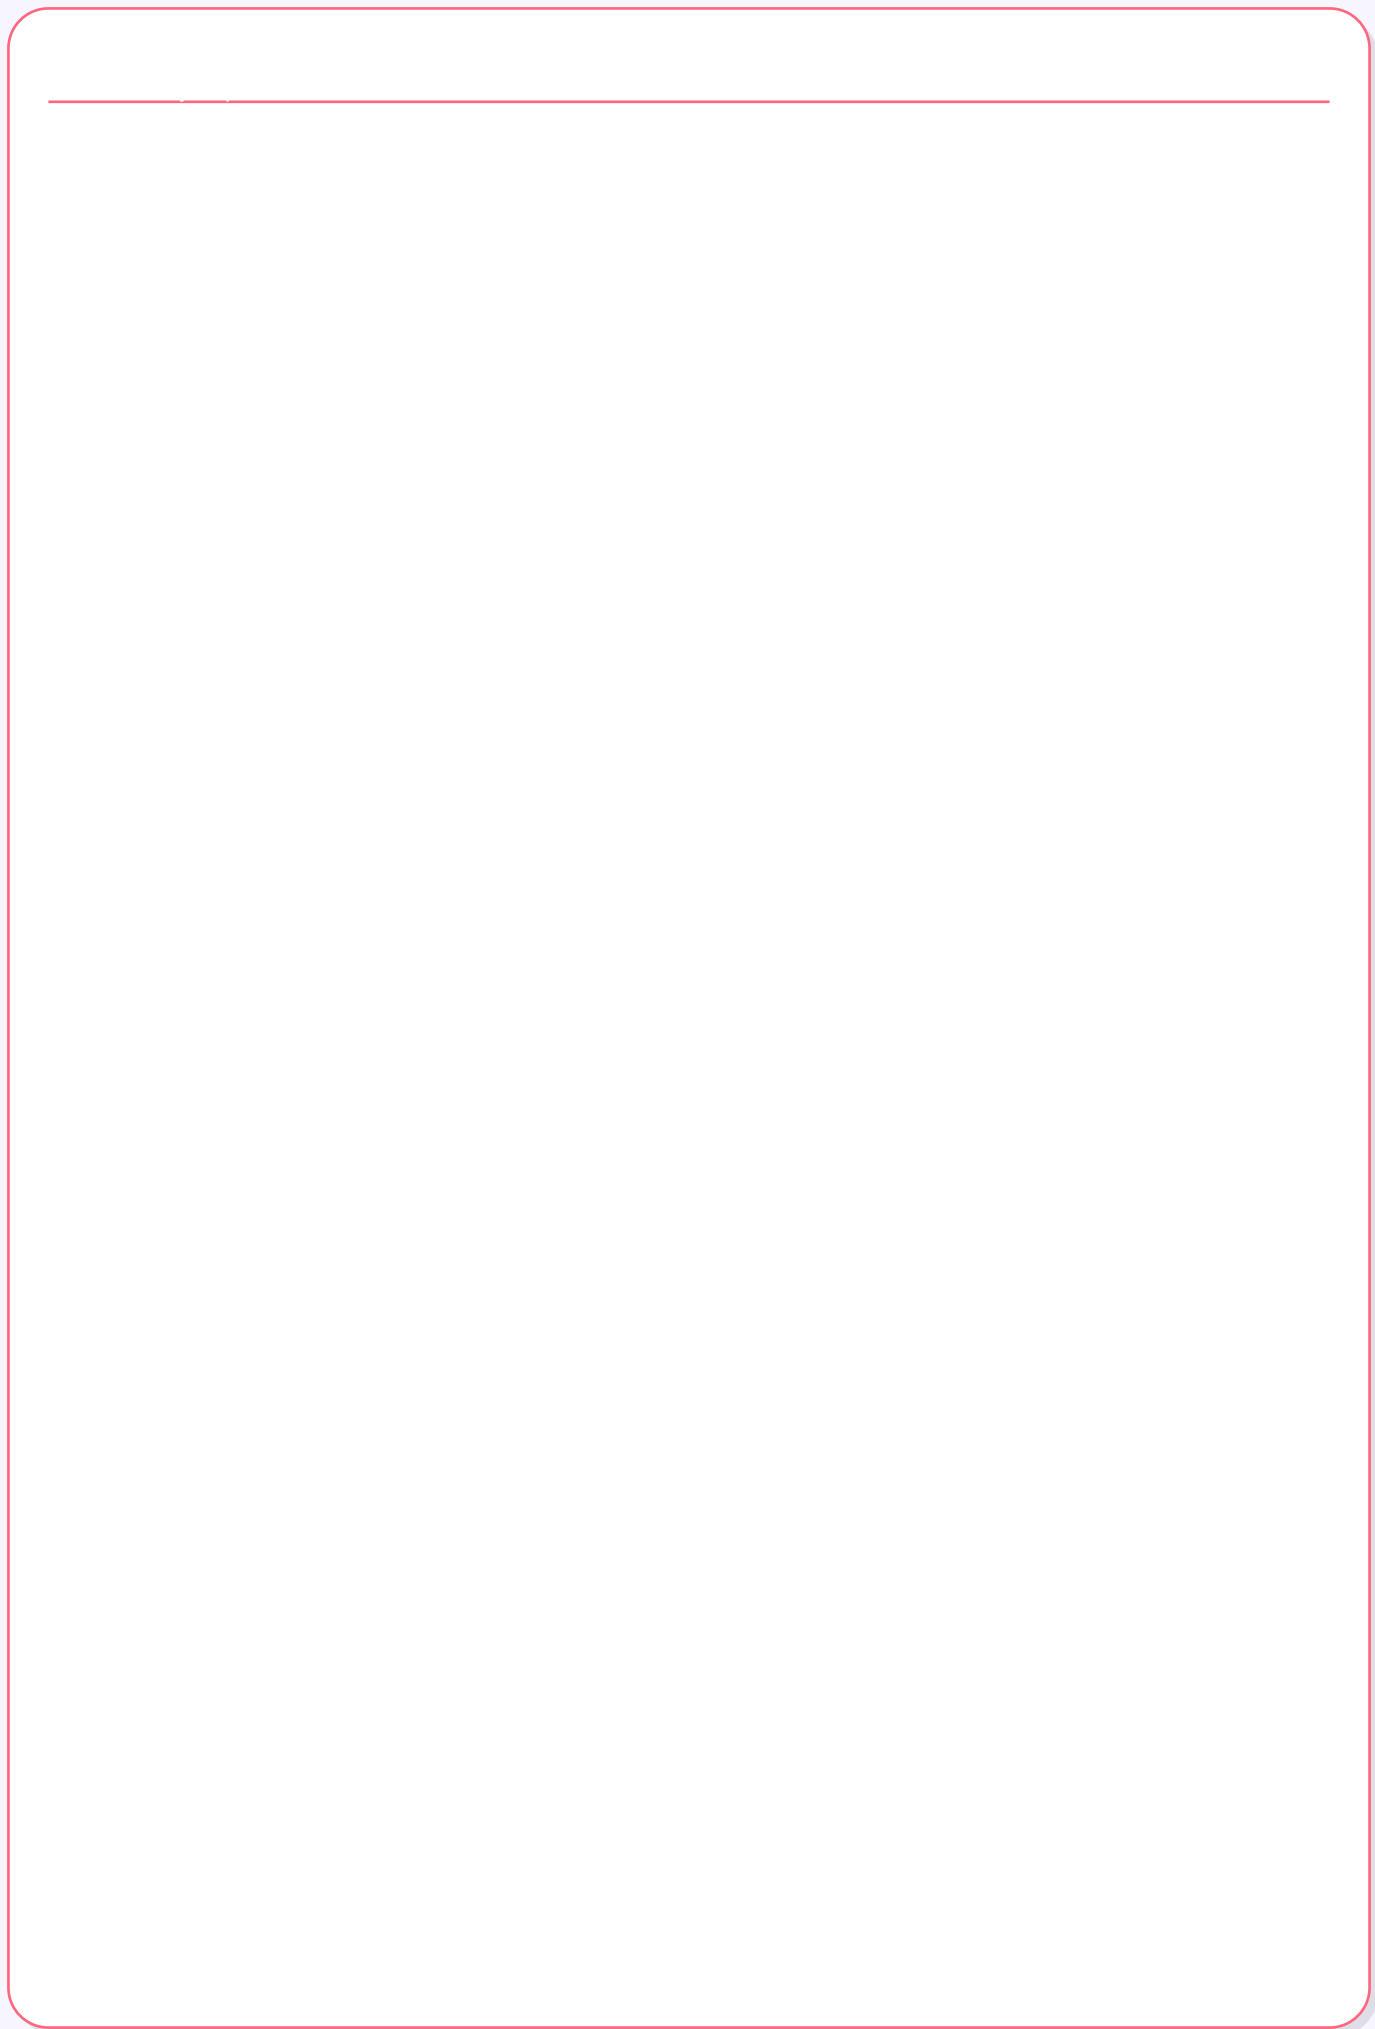

Questions 828\nExercises 829\nSelected Bibliography 832\nPart 10: Additional Database Topics: Security and Distribution\nChapter 24 Database Security 835\n24.1 Introduction to Database Security Issues 836\n24.2 Discretionary Access Control Based on Granting and Revoking Privileges 842\n24.3 Mandatory Access Control and Role-Based Access Control for Multilevel Security 847\n24.4 SQL Injection 855\n24.5 Introduction to Statistical Database Security 859\n24.6 Introduction to Flow Control 860\n24.7 Encryption and Public Key Infrastructures 862\n24.8 Privacy Issues and Preservation 866\n24.9 Challenges of Database Security 867\n24.10 Oracle Label-Based Security 868\n24.11 Summary 870\nReview Questions 872\nExercises 873\nSelected Bibliography 874\nChapter 25 Distributed Databases 877\n25.1 Distributed Database Concepts 878\n25.2 Types of Distributed Database Systems 883\n25.3 Distributed Database Architectures 887\n25.4 Data Fragmentation, Replication, and Allocation Techniques for Distributed Database Design 894\n25.5 Query Processing and Optimization in Distributed Databases 901\n25.6 Overview of Transaction Management in Distributed Databases 907\n25.7 Overview of Concurrency Control and Recovery in Distributed Databases 909\n25.8 Distributed Catalog Management 913\n25.9 Current Trends in Distributed Databases 914\n25.10 Distributed Databases in Oracle 915\n25.11 Summary 919\nReview Questions 921\nExercises 922\nSelected Bibliography 924\nPart 11: Advanced Database Models, Systems, and Applications\nChapter 26 Enhanced Data Models for Advanced Applications 931\n26.1 Active Database Concepts and Triggers 933\n26.2 Temporal Database Concepts 943\n26.3 Spatial Database Concepts 957\n26.4 Multimedia Database Concepts 965\n26.5 Introduction to Deductive Databases 970\n26.6 Summary 983\nReview Questions 985\nExercises 986\nSelected Bibliography 989\nChapter 27 Introduction to Information Retrieval and Web Search 993\n27.1 Information Retrieval (IR) Concepts 994\n27.2 Retrieval Models 1001\n27.3 Types of Queries in IR Systems 1007\n27.4 Text Preprocessing 1009\n27.5 Inverted Indexing 1012\n27.6 Evaluation Measures of Search Relevance 1014\n27.7 Web Search and Analysis 1018\n27.8 Trends in Information Retrieval 1028\n27.9 Summary 1030\nReview Questions 1031\nSelected Bibliography 1033\nChapter 28 Data Mining Concepts 1035\n28.1 Overview of Data Mining Technology 1036\n28.2 Association Rules 1039\n28.3 Classification 1051\n28.4 Clustering 1054\n28.5 Approaches to Other Data Mining Problems 1057\n28.6 Applications of Data Mining 1060\n28.7 Commercial Data Mining Tools 1060\n28.8 Summary 1063\nReview Questions 1063\nExercises 1064\nSelected Bibliography 1065\nChapter 29 Overview of Data Warehousing and OLAP 1067\n29.1 Introduction, Definitions, and Terminology 1067\n29.2 Characteristics of Data Warehouses 1069\n29.3 Data Modeling for Data Warehouses 1070\n29.4 Building a Data Warehouse 1075\n29.5 Typical Functionality of a Data Warehouse 1078\n29.6 Data Warehouse versus Views 1079\n29.7 Difficulties of Implementing Data Warehouses 1080\n29.8 Summary
